

HDMI Audio De-Embedder 4K (60Hz 4:4:4) with HDR

The PT-C-HDADE is an HDMI2.0a audio extractor with a variety of audio extraction ports supporting the full HDMI bandwidth making it ideally suited for home cinema and high end professional installations. 18Gbps video is passed through and audio is extracted from the stream in both digital and analogue formats. The device has the ability to mask the display EDID so that if for instance, the TV does not support Dolby Digital audio, DTS can still be extracted and passed directly to an AVR. This intelligent feature ensures compatibility with any 4K TV or monitor.

CINEMA SOUND EXTRACTION

Extracts PCM, Dolby Digital, DTS, and DTS-HD regardless of the audio format supported by the display. Audio is output via balanced Phoenix, stereo RCA or digital COAX making it ideal for pro home cinema.

FULL 18GBPS AND HDR

Compatible with the latest Ultra High Definition sources and displays, displaying signals at resolutions up to 4K @60 4:4:4 (18Gbps) and shows crystal clear HDR media to its best ability.

CEC AND EDID MANAGEMENT

Designed for flawless operation and simple usage. CEC pass through simplified control and EDID management including fixed EDID masking for AVR compatibility ensure impeccable communication between devices.

ULTRA SLIM DESIGN

All of this technology is packed into a slim line enclosure, for installation into furniture or snugly behind the TV.
