FRONT VIEW

BACK VIEW

POWER SOCKET PINOUT

HARDWARE INSTALLATION

1. Connect the power adapter to the socket on the front of the device. Then plug the other end of the power adapter into a power outlet.
2. Connect to the device via an Ethernet cable connected to LAN port.

LOGIN TO DEVICE

1. To enter the router's Web interface (WebUI), type <http://192.168.1.1> into the URL field of your Internet browser.
2. Use login information shown in image A when prompted for authentication.
3. After you log in, you will be prompted to change your password for security reasons. The new password must contain at least 8 characters, including at least one uppercase letter, one lowercase letter, and one digit. This step is mandatory, and you will not be able to interact with the router's WebUI before you change the password.
4. When you change the router's password, the [Configuration Wizard](#) will start. The [Configuration Wizard](#) is a tool used to set up some of the router's main operating parameters.

A.

The screenshot shows the Teltonika login page. On the left, there is a logo for TELTONIKA and the text 'AUTHORIZATION REQUIRED' followed by 'Please enter your username and password'. On the right, there are two input fields: the first contains 'admin' and the second contains 'admin01'. Below the input fields is a button labeled 'LOG IN'.

SETUP WIZARD

After logging in to the router's WebUI, you will be prompted to change the default password and the Setup Wizard will start:

1. Choose your time zone and sync the router's time with the browser if needed.

TIME ZONE SETTINGS

Current system time Thu Mar 7 14:49:06 2019

Time zone

2. Default LAN settings are recommended unless you have specific requirements for your LAN network.
